DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 21-60, 69, 71, 73 and 75, drawn to a means for selectively interfering with pathological cell survival processes in vitro and in vivo.

Group II, claim(s) 61-68, 70, 72, 74 and 76, drawn to a method of using SELF non-thermal fields for biotechnological gene modification.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I pertains to a means for treating pathological cells such as cancer or AIDS to interrupt the cell processes, whereas Group II pertains to gene modification which can be used as part of the process in gene therapy.

3. A telephone call was made to Robert Simpson on June 18, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
